1. this would give the terrorists too much control and opportunity
2. In the event of an on board emergency too many people would be using cell phones instead of paying attention to the F/A's on our instructions, which would cause DEATH to them or to ohters BECAUSE of them! More people would be injured or die because they were not paying attention to us.
3.) It would cause too much tension and havoc with other passengers that would create an atmosphere for an uncomforable, restless, and irritating travel experience that hightens anger levels, leaving an open season for confrontations between passengers that would easily elevate to physical confrontations, putting the intire flight in a safety compromise.
4.) There is no substantial proof that using the phones on board an aircraft during flight is safe and has no effect on instrumentation of the aircraft CELL PHONES ARE A DANGEROUS CONCEPT
